

School Performance Data End of 2016 Academic Year

Below is a summary of the end of year attainment data for the 2015/16 academic year.

In some subjects the school is achieving above national and Surrey data, in some subjects it is achieving below.

Last year saw the introduction of a new testing system in KS1 and KS2. The moderation of the marking of these systems is new and it is generally acknowledged that schools and councils need more experience of marking and moderating these tests to ensure that all schools are being assessed and assessing fairly to one standard.

As a school, we have analysed these results carefully and where we feel necessary, we have enhanced our teaching and learning in specific subjects to provide the children with better opportunities to achieve well in all areas of the curriculum.

We also use our own tracking system to ensure that we can provide support to children in subjects when they need it.

The statutory testing processes are challenging for our young people and we are very proud of each of them for giving their best in these tests.
